

Sunsmart Policy 2022

Purpose

The purpose of this policy is to encourage behaviours at Bass Coast Specialist School to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

Scope

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

Policy

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours.

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the SunSmart widget on the school's website, the free SunSmart app, or at sunsmart.com.au or bom.gov.au.

Bass Coast Specialist School has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

Shade

Bass Coast Specialist School will provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

- outdoor lesson areas
- popular play areas

When building works or grounds maintenance is conducted at Bass Coast Specialist School that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Sun protective uniform/clothing

Bass Coast Specialist School recommends that from mid-August to end of April, and whenever UV levels reach 3 and above, students come to school wearing sun-protective clothing such as:

- loose, cool, closely woven fabric
- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts
- rash vests or t-shirts for outdoor swimming activities.

For terms 1 & 3, all students **must** wear a sun protective hat that shades the face, neck and ears for all outdoor activities, for example broad-brimmed, legionnaire or bucket hats. Students who are not wearing appropriate protective clothing or a hat may be asked to play in the shade or in a suitable area protected from the sun. Hats may also be worn for all outdoor activities outside of the Term 1 & 3 time period, by parent or student choice. Staff are also advised to follow these guidelines.

Sunscreen

Bass Coast Specialist School encourages all students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours according to [manufacturer's instructions](#).

Bass Coast Specialist School has strategies in place to remind students to apply sunscreen before going outdoors and sunscreen is available in every classroom and at the office. Staff and students who may suffer from allergic reactions from certain types of sunscreen are encouraged to contact the school office to implement a management plan to reduce the risk of an allergic reaction at school.

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside.

Curriculum

Students at our school are encouraged to make healthy choices and are supported to understand the benefits and risks of sun exposure. Bass Coast Specialist School will address sun and UV safety education as part of Health & PE lessons in class, and explicit teaching of how we are “safe” in all settings (School-Wide Positive Behaviour Support [SWPBS] Behaviour Matrix).

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

Communication

This policy will be communicated to our school community in the following ways:

- Available publicly on our school's website
- Included in staff induction processes
- Discussed at staff briefings/meetings as required
- Referenced in our staff handbook/manual
- Made available in hard copy from school administration upon request
